## MoGo Mouse BT

• Jan 10, 2007 at 9:57 PM

Sometimes you just see something cool at CES. I want one of these. It flattens down and fits in a laptop card slot, making storage a breeze for most folks. Pop it out, flip up the "kickstand" and it connects to the laptop via Bluetooth. No batteries are required 'cause it recharges itself in your laptop slot. HP just bought the design from the original developer, Newton Peripherals. The price is a little steep at \$70, but what price do you pay for something designed this well...
