

MoGo Headset™

The Bluetooth-enabled headset that attaches to your cell phone and recharges itself automatically.

The world's thinnest product of its kind, the MoGo Headset combines the freedom of Bluetooth mobility with leading-edge product design and convenience. Ultra-light and comfortable, MoGo Headset is the first device that stores and recharges by snapping onto a cell phone or sliding into a laptop. With up to six continuous hours of talk time and a sleek, omni-directional microphone, MoGo Headset takes its users virtually anywhere they want to go.

MoGo Headset delivers on the promise of superior technology combined with unparalleled portability.

- World's thinnest headset (5 mm thin)
- Bluetooth 2.0 compatible
- Rechargeable polymer lithium ion battery allows up to six hours of talk time and over five days of standby time
- Recharges in less than an hour
- Clear, omni-directional microphone
- User interface control key for power on/off and send/end
- Flexibility to be worn on either ear
- Blue and green LED indicators
- Four convenient ways to recharge: snapping onto a cell phone, inside PCMCIA or ExpressCard 34 slots in a laptop, or optional AC adapter
